DETAILED ACTION

Status of Application

Claims 1, 2, 4-7 and 10-12 are pending and presented for examination.

Response to Arguments

Applicant's arguments with respect to claims 1, 2, 4-7 and 10-12 have been considered but are moot in view of the new ground(s) of rejection.

Claim Rejections - 35 USC § 112

The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

1. Claims 1, 2, 4-7 and 10-12 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention. Claim 1 now recites that "said enamel is fully cured by means of ultraviolet radiation." However, the specification fails to support the enamel being **fully** cured by means of ultraviolet radiation. The specification only discloses curing using ultraviolet radiation, and the examples in the specification are conducted by curing by both baking and application of ultraviolet radiation. Furthermore, there is no suggestion that any of these treatments **fully** cure the enamel. It should be noted in the baking enamel art that there are generally different levels

Art Unit: 1717

of curing of the baking enamel, and the specification makes no note of the degree of cure achieved by the treatment with ultraviolet radiation alone, and one having ordinary skill would not inherently have assumed that the enamel could be or was fully cured by means of ultraviolet radiation. As the specification makes no mention of the degree of cure of the baking enamel, it can not be said to support that the baking enamel is fully cured by means of ultraviolet radiation, particularly given that the only examples additionally disclose heating to cure the baking enamel and these make no mention of whether the enamel is fully cured. Finally, claims 2, 4-7 and 10-12 depend from claim 1, and therefore also fail to comply with the written description requirement.

Conclusion

Claims 1, 2, 4-7 and 10-12 are pending.

Claims 1, 2, 4-7 and 10-12 are rejected.

No claim is allowed.

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a).

Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37

Art Unit: 1717

CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
